## ACKNOWLEDGEMENTS

---

These standards represent the work and involvement of many members of Utah State government through providing position titles and descriptions, completing questionnaires, meeting with the consultants as part of the Steering Committee, being interviewed regarding position functions for employees within each department, and more. We thank all of the people who contributed to this process.

### UTAH STATE BUILDING BOARD

Nolan Karras, *Chair*  
Carolyn McNeil  
Earl Monson  
Elloyd Marchant  
Meiling Hales  
Lynne Koga

### DEPARTMENT OF HUMAN RESOURCE MANAGEMENT

John Matthews, *State Compensation  
Director*

### CONSULTANTS

*Brixen & Christopher Architects*  
James W. Christopher, FAIA  
J. Arthur Pett, Jr., AIA  
Steven Mansfield  
Pauleen Kasai

### *Wikstrom Economic & Planning Consultants, Inc.*

Karen Wikstrom, AICP  
Brenda Weaver

### DIVISION OF FACILITIES CONSTRUCTION AND MANAGEMENT

Neal Stowe, FAIA, *Director*  
Lyle Knudsen, *Deputy Director*  
Wayne Bingham, AIA, *Deputy Director*  
Ken Nye, *Deputy Director*  
Jack Quintana, *Deputy Director*  
Rick James, *Project Analyst/Planner, Project  
Manager*  
Susan Hardy, *Project Analyst/Planner*  
Steve Milligan, *Contract Specialist*  
Doug Roy, *Computer Technician*  
Tracie Cunningham, *Secretary*

### INTERNS

Hans Fagerlund  
Robyn Ireland  
Nickolas Wray

Grateful acknowledgement is made to members of the Space Standards Steering Committee, who represented individual departments or divisions in Utah State government.

#### STEERING COMMITTEE

---

<i>Administrative Services</i>	Mason Bishop
<i>Agriculture</i>	Van Burgess, Joan Winger
<i>Alcoholic Beverage Control</i>	Dennis Kellen
<i>Attorney General</i>	David Lamb
<i>State Auditor</i>	Dean Eborn, Jana Obray

<i>Planning &amp; Budget</i>	Lynne Koga, Scott Mecham

## **I. SPACE STANDARDS POLICY**

---

### **INTRODUCTION**

These Space Standards are the first major revision to the standards developed in 1967 and 1968 and adopted by the State of Utah. The 1994 standards reflect changes in the office environment since that time and will be the foundation for estimating office space needs. The standards will be used by architects, planners and the Division of Facilities and Construction Management in determining space requirements for state building projects. The purpose of this document is to establish policies, standards and processes which will provide state employees with functional work environments appropriate for required tasks and maximize the efficient use of space. The standards are a tool to assist in the programming and planning of new projects, major remodeling and leased space.

### **SCOPE AND APPLICATION**

These space standards apply only to Utah State office space and office support space and include:

- Office space area standards for state positions;
- Space standards for conference rooms and reception areas; and
- Space standards for commonly used furnishings and equipment, commonly used in support areas.

Spaces other than offices and office support spaces are more specialized by agency and must be dealt with on a project-by-project basis.

### **Agencies Affected**

This volume of the Utah State Space Standards applies to all State agencies and institutions with the exception of the following:

Office of the Governor  
Legislative Branch of State Government  
Lieutenant Governor  
Utah National Guard  
Higher Education  
University of Utah Medical Center

It is anticipated that space standards for office space and office support space for Higher Education will be included in a future document.

## SPACE STANDARDS ARE BASED ON POSITION FUNCTIONS AND REQUIREMENTS

The development of office space standards allows for the uniform assignment of space from agency to agency so that space is equally distributed to similar position descriptions across state government. The standards are *functionally based* with the primary determinant being the activities and tasks performed in a particular position. Based on interviews, questionnaires, and research of other organizations, the standards are appropriate and supportive of most functions and provide space necessary to permit efficient performance of tasks. Position titles, pay classifications, seniority or rank are not as relevant to space assignment determinations as are the activities and duties performed by personnel occupying office space. The space allocations should also be adequate for the furniture and equipment needed by employees to perform assigned tasks.

### PRIVATE V. OPEN OFFICES

It is State policy that employees will have open office workstations with few exceptions. It is recognized that this policy is unworkable without the provision of an adequate amount of conference space to accommodate less frequent privacy requirements for staff supervision and discussion of confidential matters.

Private offices generally will be assigned on the basis of functional need. By far the most common functional need for privacy is frequent discussion of confidential matters in person or on the phone. Other occasional needs for privacy are as an aid to concentration or for security and for isolation of confidential documents.

A position must meet one of the following criteria in order for a private office to be permitted. *Adequate conference space must be assumed (and provided) as part of these criteria.*

- Position requires regular, confidential meetings with citizens or clients of a frequency and duration which cannot be accommodated in conference space.
- Position requires engagement in confidential conversations relative to agency internal matters or supervision of a number of personnel which involves dealing with sensitive personnel matters with a frequency and duration that cannot be accommodated in conference space.
- Position is responsible for sensitive investigations involving regular and frequent interviews or phone conversations in the work place that cannot be accommodated in conference space or separate interview rooms. Such investigations involve hearings, trials, actions against or on behalf of citizens of the State, or sensitive personnel investigation matters.

The standards indicate which positions have been assigned private offices. If it is concluded by an agency that a private office is needed for a position for which a private office is not assigned in the standards, a "Request for Deviation from Space Standards" form must be submitted to DFCM signed as required.

#### EXCEPTIONS TO THE STANDARDS

It is recognized that the standards may not be applicable in every situation. Where necessary and justified, exceptions can and will be made for special requirements or activities related to a particular position, existing furniture, existing building configuration or other physical constraints.

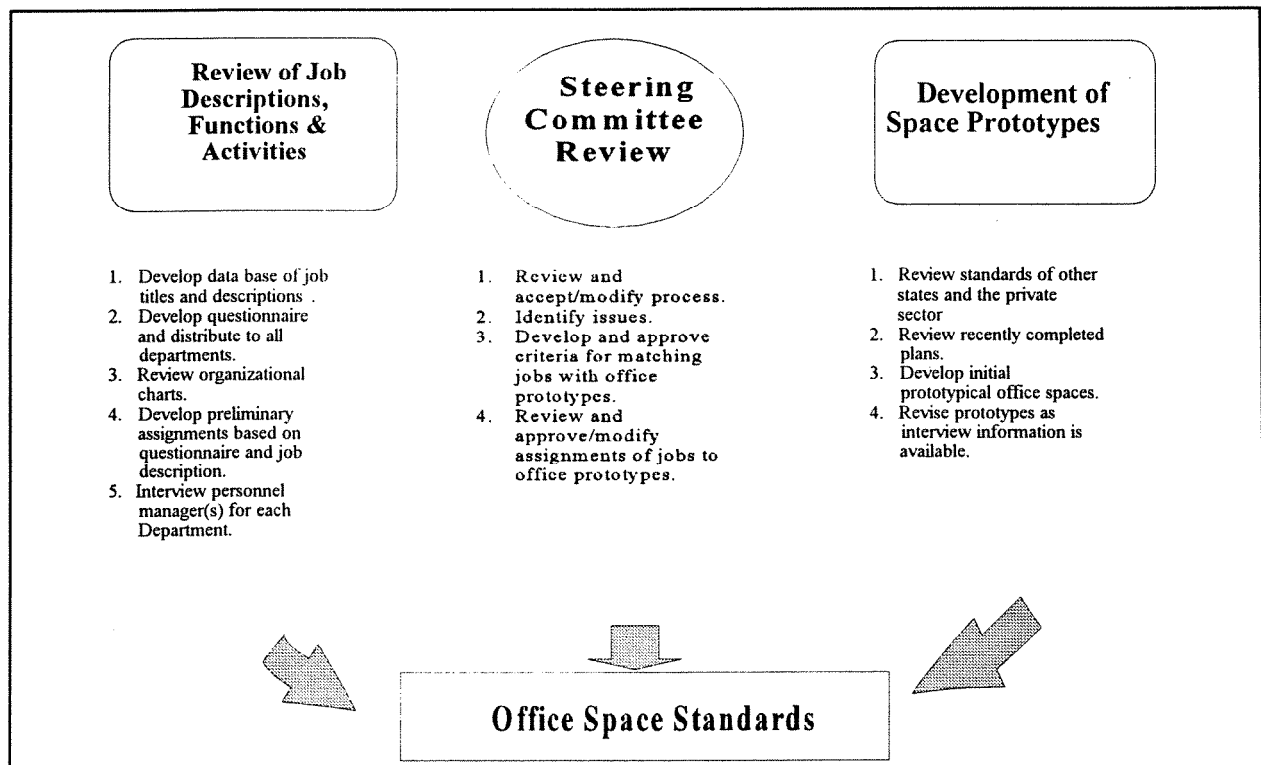

The space standards do not apply to existing spaces as presently configured. Existing space will not be required to be remodeled solely to satisfy the space standards. It is recognized that the use of the standards in programming space will be related to the acquisition of new space (through new construction or leases) or the reconfiguration and substantial renovation of existing space. Upon requests for new or additional space, the standards will be used to evaluate utilization of existing space.

## II. METHODOLOGY

The standards have been developed with the involvement and input of the State departments which will be affected by the standards. The departments were involved through representation on and participation in the Steering Committee, the completion of detailed questionnaires about the functions and physical space requirements for each position title and in-depth interviews with department supervisory staff to review preliminary assignments of standards. Where required, changes were made to preliminary assignments and the final assignments were reviewed by the departments.

In addition, office space standards documents of many states and private sector space standards for major corporations were collected and reviewed. Programs and floor plans developed for state offices in the past five years were analyzed to identify implicit standards in the recent assignments of space for state agencies.

The process for developing these standards is illustrated below:

### III. SPACE STANDARDS

---

#### INTRODUCTION

The Space Standards have four main components: general standards for individual private and open office spaces; standards for furniture and equipment within office support areas such as copy areas; and standards for conference rooms and reception areas. Also included are a factor for internal circulation and partitions and a "gross area factor." The internal circulation factor when multiplied by the offices and support spaces results in Net Useable Area. Multiplying the Net Useable Area by the Gross Area Factor will give a total gross building area. The Gross Area Factor should only be used in rough preliminary calculations.

Space standards for open-office work stations are based on the use of systems furniture. Space standards for private offices assume that conventional furniture will be used. Systems furniture uses less space than conventional furniture. Therefore, the standards include a "conventional furniture factor" which is an upward adjustment in the size of open-office work stations if conventional furniture is used.

The space standards are to be used when requesting additional space. Forms incorporating the standards into the space request process are included in Section IV.

Diagrams illustrating space standards for office space, furniture and equipment, conference rooms, waiting areas are included in Section V.

#### GENERAL OFFICE SPACE STANDARDS

Below are space standards for various position categories in Utah State government. Written request must be made for deviation from these general assignments and from the specific assignments in the database for each State position.

##### **Administrative Positions**

**A Group**      Position usually requiring administration of several groups which report directly to it. Most such positions report directly to the governor. Position has conference needs for six to eight people within office. Larger meetings will be held in a separate conference room. Visual and audio privacy is an important concern. Equipment and storage needs are generally modest. Examples: Commissioner, Department Executive Director, Deputy Director of large department, Division Director of large division.

*Space Standard: 280 sq. ft. private office.*

**B Group** Position usually requiring administration of a number of subgroups and reporting directly to an "A Group" position. Position has conference needs for four to six people in office. Larger meetings will be held in a separate conference room. Visual and audio privacy is an important concern. Equipment and storage needs are generally modest. Examples: Department Deputy Director, Division Director.

*Space Standard: 220 sq. ft. private office.*

**C Group** Position usually responsible for a specific subgroup and reporting directly to a "B Group" position. Position has conference needs for two to four people within office. Larger meetings will be held in a separate conference room. Visual and audio privacy may be an important concern. Equipment and storage needs are generally modest. Examples: Assistant Division Director, Deputy Commissioner.

*Space Standard: 144 sq. ft. open-office work station.*

A private office of up to 150 sq.ft. can be considered for positions which meet the criteria for private offices.

#### **Supervisory Positions**

**D Group** Position overseeing a large number of professional or technical personnel. Position has conference needs for two to four people within the office on a regular basis. Larger meetings will be held in separate conference room. Visual and audio privacy is not an important concern. Standard office equipment, filing, storage and work surface needs can be met. Examples: Bureau or Section Manager.

*Space Standard: 120 sq. ft. open-office work station.*

An open-office work station of up to 144 sq. ft. can be considered if the position:

- involves meetings with a minimum of four people on a regular, daily basis that cannot be reasonably held in separate conference space; and
- has extraordinary equipment requirements.

A private office of up to 150 sq.ft. can be considered for positions which meet the criteria for private offices.

**E Group** Position overseeing a limited number of personnel with conference needs for one or two people within office. Larger meetings will be held in separate conference room. Standard office equipment, filing, storage and work surface

needs can be met. Visual and audio privacy is not an issue. Examples: Managers, Senior Professionals.

*Space Standard: 100 sq. ft. open-office work station.*

A private office of up to 120 sq.ft. can be considered for positions which meet the criteria for private offices.

## **Professional/Technical Positions**

**F Group** Full-time-professional position requiring extensive training. Conducts conferences with one to three visitors in office. May have supervision of a limited number of personnel. Larger conferences will be held in separate conference room. Visual and audio privacy is an important concern. Standard office equipment, filing, storage and work surface needs can be met. College and university faculty need ample book shelving and file space. Examples: Attorneys, Administrative Law Judges, Hearing Officers.

*Space Standard: 120 sq. ft. private office.*

A private office of up to 150 sq.ft. can be considered for similar positions which:

- conduct regular hearings within their office; or
- meet regularly with four visitors and the meetings cannot be accommodated in separate conference space; or
- which meet with up to three visitors but have extraordinary needs for work surface or other furniture and equipment.

**G Group** Full-time-professional/technical position requiring specialized training. Visual and audio privacy may be an important concern. Confers with one or two visitors within office. Larger meetings will be held in a separate conference room. Standard office equipment, filing, storage and work surface needs can be met. Examples: Counselor, Case Worker.

*Space Standard: 81 sq. ft. open-office work station.*

Open-office work stations of up to 100 sq.ft. can be considered for positions which:

- involve regular meetings with one or two visitors; and
- have extraordinary in-office equipment, filing or storage needs.

A private office of up to 120 sq.ft. can be considered for positions which meet the criteria for private offices.

**H Group** Full-time-professional/technical position requiring specialized training, without special visual and audio privacy needs. May have supervision of a limited number of personnel. Confers with one or two visitors within office or requires a generous amount of work surface. Standard office equipment, filing, storage and work surface needs can be met. Examples: Educational Specialist, Architect.

*Space Standard: 81 sq. ft. open-office work station.*

An open-office work station of up to 100 sq.ft. can be considered for positions that:

- require special equipment such as a drafting table or several items of electronic equipment in addition to the work surface and visitor requirements outlined for this Group:

**I Group** Full-time-professional/technical position requiring specialized training, or paraprofessional position without special visual and audio privacy needs. Meets with a single visitor or no visitors within the work station. Standard office equipment, filing, storage and work surface needs can be met. Examples: Accountant, Analyst, Data Processing Programmer.

*Space Standard: 64 sq. ft. open-office work station.*

An open-office work station of up to 81 sq.ft. can be considered for positions with:

- extraordinary equipment, filing, storage or work surface requirements.

### **Clerical Positions**

**J Group** Full-time-senior position involving clerical responsibilities (word processing, filing, screening phone calls, data entry, etc.). May include overseeing a limited number of personnel. Does not require visual and audio privacy. Meets with a single visitor or no visitors within work station. Standard clerical equipment, filing, storage and work surface needs can be met. May include a stand-up service counter. Example: Secretary.

*Space Standard: 81 sq. ft. open-office work station.*

**K Group** Full-time-clerical position (word processing, filing, data entry, etc.). No visitor accommodation within work station. Equipment, filing, work surface and storage needs must be considered and will vary. Position involves paper-intensive tasks which require large work-surface area. Example: Clerk/Tech.

*Space Standard: 64 sq. ft. open-office work station.*

A smaller open-office work station of no less than 49 sq.ft. can be considered for positions which:

- do not involve not paper-intensive tasks (such as data entry or filing); and/or
- adjacency to common file or work area is provided.

### **Field, Shop/Lab/Warehouse, and Intern Positions**

**L Group** Full or part-time position where personnel are out of the work station more than 50 percent of the time or are present only seasonally. Visual privacy is not required. Applicable also to positions requiring a work station in a shop, lab or warehouse, for data entry, record-keeping and communication. Standards office work surface needs can be met. Examples: Inspector, Lab Technician, Intern, Warehouse Supervisor.

*Space Standard: 36 sq. ft. open-office work station.*

An open-office work station of 49 sq.ft. can be considered for similar positions with:

- extraordinary equipment, filing or work-surface needs.

### **NA - Positions Not Requiring Assigned Office Space**

Positions not requiring assigned office space. Examples: Electrician, Maintenance Worker, Driver License Examiner.

**GENERAL OFFICE SPACE STANDARDS SUMMARY**  
(in Square Feet)

<b>Designation</b>	<b>Open Office Work Station</b>	<b>Private Office</b>
A Group		280
B Group		220
C Group	144	
D Group	120	
E Group	100	
F Group		120
G Group	81	
H Group	81	
I Group	64	
J Group	81	
K Group	64	
L Group	36	

## FURNITURE AND EQUIPMENT SPACE STANDARDS FOR SUPPORT SPACES

Furniture and equipment space standards are for determining areas of support spaces which differ among individual State agencies. Examples are file, copy and storage areas and common work areas. Because the needs of agencies differ, it is not possible to have a single space standard for a "file area," a "copy area," a "storage area," or a "common work area." The space standards are for individual items of furniture and equipment. The standards can be translated into an area for a particular space by listing each type of furniture or equipment required, determining the quantity of each type, and then multiplying each quantity by the space standard for the specific item. Do not use the furniture and equipment space standards to determine office areas; use the office space standards.

Diagrams showing how furniture and equipment space standards were derived are included in Section V, "Diagrams Illustrating Space Standards."

Type of Furniture or Equipment	Designation	Length (Inches)	Area Allowance (Square Feet)
Bookcase	BC1	30	8
	BC2	36	10
	BC3	42	11
	BC4	48	13
	BC5	60	16

Flat Files 48 Inches Deep	FF2	60	50
Fax Machine	FX1		14
Laser Printer	LP1		9

## CONFERENCE ROOM SPACE STANDARDS

Conference rooms are enclosed spaces in an office environment where meetings at a table may be held in privacy. When open office work stations are the predominant type of office in an agency, it is critical to the success of the arrangement that there are enough conference rooms of appropriate sizes to meet the needs for private meetings. **Adequacy of number and size of conference rooms is critical to the success of an open office plan.**

Sometimes for small meetings of a non-confidential nature, conference areas do not need walls from floor to ceiling but can have low partitions. Space standards for open conference areas are the same as for conference rooms.

The space standards below are for conference rooms for up to 20 people. Conference rooms for more than 20 people are considered specialized space and should be dealt with on a case-by-case basis.

It may be noted that the area per person in a conference room for 20 people is greater than the area per person for some smaller groups of people. This occurs because a "square donut" configuration appropriate for larger groups requires increased area per person.

Designation	Number of People	Space Standard (Square Feet)
CR4	4	120
CR6	6	150
CR8	8	200
CR10	10	230
CR12	12	260
CR16	16	340
CR20	20	460

Examples of conference room layouts are shown in Section V, "Diagrams Illustrating Space Standards." The layouts do not have the exact areas of the space standards, but they show arrangements and clearances that are possible within the limits of the space standards.

All conference room diagrams shown include space for a five-foot wheelchair turning circle (requiring moving chairs in some cases).

## **RECEPTION AREAS SPACE STANDARDS**

Reception areas are areas in an office environment where visitors received and may sit while waiting. These space standards for reception areas apply to the visitor seating areas only. Standards for receptionists' work stations are included in the standards for offices. Circulation space within reception areas is allowed for in the internal circulation factor which is described on page 18. The space standards below are for up to 8 visitors. Reception areas for more than 8 visitors are considered "specialized space" and should be dealt with on a case-by-case basis.

<b>Designation</b>	<b>No. of Visitors</b>	<b>Space Standards (Square Feet)</b>
RA2V	2	50
RA4V	4	100
RA6V	6	130
RA8V	8	180

Examples illustrating the derivation of the reception area space standards are shown in Section V, "Diagrams Illustrating Space Standards."

### INTERNAL CIRCULATION AND PARTITION FACTOR

Offices and open office workstations and their support spaces require aisles and halls for internal circulation within department or agency areas. Internal circulation usually will not include building lobbies but is the area inside the front door of a department or agency. Some additional area will also be required for walls and partitions. An "internal circulation and partition factor" multiplied by the total assignable area of offices, workstations, and support areas will give the area required for internal circulation and partitions. This factor should be between 30 percent and 35 percent. Use the 30 percent factor in all calculations except when two thirds or more of office, work station and support spaces are 100 sq.ft. or less in area. In this case, a 35 percent factor should be applied.

The internal circulation and partition factor is very important because it is multiplied by the net areas of office and support space to give a large component of the space required by an agency. Adding the area of office and support spaces to the area allowed for internal circulation and partitions gives the "Net Useable Area."

### GROSS AREA FACTOR

A "gross area factor" is a multiplier which can be applied to net useable area at the early stages of the planning process to arrive at a very approximate gross or total overall area of a building. In actual buildings, gross area factors vary significantly for many reasons. Use a factor of 1.3 in early planning to estimate this figure.

## CONVENTIONAL FURNITURE FACTOR

Utah State Office Space Standards are based on use of "systems furniture" in open office work stations and "conventional furniture" for private (closed) offices.

"Systems furniture" refers to systems of interconnecting components (work surfaces, drawers, keyboard trays, divider panels, etc.) from which entire work stations can be assembled as single integrated pieces of furniture. "Conventional furniture" refers to separate freestanding items of furniture such as filing cabinets, desks, and bookcases.

Although the State's goal is to use only systems furniture in open office work stations, this can only gradually be achieved as the State's inventory of conventional furniture is phased out. Some open office work stations will continue to incorporate conventional furniture. (It should be noted that in practice, systems furniture often will be used in closed offices and that this generally will result in more efficient use of space).

Conventional furniture generally requires more floor area than systems furniture, especially in smaller offices, and a factor must be used to increase open office work station standards when conventional furniture is used in open office work stations 100 square feet or less in area.

**Space Standards for open office work stations 100 square feet or less in area should be multiplied by 1.15 when using conventional furniture for open-office work stations.**

#### IV. USE OF STANDARDS IN SPACE REQUEST PROCESS

---

The Utah State Office Space Standards are the starting point for space planning and programming. As such, it is important to recognize that the space planned and built may differ from the standards as a more specific understanding of functions and special requirements is developed. However, no deviation from the standards is allowed without the appropriate justification and approvals. Therefore, the standards include a mechanism for requesting changes or modifications to the standards as part of the space request process.

This section includes a series of forms for calculating space requirements using the standards for workstations, furniture and equipment, and support spaces. The forms include:

- **Office and Workstation Request Form** (Form "A") which summarizes the space needs related to the number of Full Time Equivalent (FTE) employees by position type;
- **Office Support Space Request Form** (Form "B") which deals with support spaces such as reception areas, conference space, space for special equipment and furniture and specialized spaces such as libraries, break areas/rooms, etc.;
- **Total Current Space Request Summary Form** (Form "C") which subtotals the workstation, support space, and specialized space requests; and
- **Deviation From Space Standards Request Form** (Form "D") for presentation of reasons for any requested modifications to any of the standards.
- **New Position Form** (Form "E") to describe a position to which a space standard has not been assigned. Submit the completed form to DFCM for assignment of a space standard, which will include a group designation ("A", "B", etc.), an area in square feet, and a determination as to whether the office should be open or private. Space standard assignments will be reviewed for appropriateness with the agency/institution.

Instruction sheets follow forms "A" through "D."

Examples of completed Forms "A", "B", "C", and "D" are included at the end of this section.

DIVISION OF FACILITIES CONSTRUCTION & MANAGEMENT  
NEW JOB TITLE FORM (FORM "E")

The purpose of this questionnaire is to find out the office space needs for this particular job title. There are questions about furniture and equipment and visitors to be accommodated. Because we are concerned about area, we ask the sizes of some furniture and equipment of current office space. The goal is to find out the right office space area, the required character of the space, and any special space needs.

I. IDENTIFICATION

- A. Classification Code \_\_\_\_\_  
B. Job Title: \_\_\_\_\_  
C. Agency/Institution: \_\_\_\_\_  
D. Division or other Component: \_\_\_\_\_  
E. Is this position currently filled? **YES** **NO** \_\_\_\_\_  
F. How many employees hold this position within this division/department? \_\_\_\_\_  
G. Questionnaire answered by: \_\_\_\_\_  
H. Phone: \_\_\_\_\_  
Date: \_\_\_\_\_

II. JOB FUNCTIONS/CHARACTERISTICS

- A. Which of the following best describes a typical employee with this job title?

- \_\_\_\_ Management.  
\_\_\_\_ Professional Staff.  
\_\_\_\_ Technical Staff.  
\_\_\_\_ Clerical Support Staff.  
\_\_\_\_ Other, please describe: \_\_\_\_\_

- B. Please check the descriptions applicable to a typical employee in this job.

- \_\_\_\_ Does not supervise other employees.  
\_\_\_\_ Supervises other employees. How many?  
\_\_\_\_ 1 to 5.  
\_\_\_\_ 6 to 20.  
\_\_\_\_ More than 20.

- \_\_\_\_ Receives work-related visitors on a regular daily basis in his/her office/workstation. How many?  
\_\_\_\_ 1 or 2 at one time.  
\_\_\_\_ More than 2 at one time.

- For how long?  
\_\_\_\_ Less than 1 hour per day.  
\_\_\_\_ 1 to 2 hours per day.  
\_\_\_\_ More than 2 hours per day.

- \_\_\_\_ Does not receive work-related visitors on a regular daily basis in his/her office/workstation.

- \_\_\_\_ Deals on a regular daily basis with matters that must remain confidential from others in the office. How often?  
\_\_\_\_ Less than 1 hour per day.  
\_\_\_\_ 1 to 2 hours per day.  
\_\_\_\_ More than 2 hours per day.  
\_\_\_\_ Does not deal regularly with work-related matters that must remain confidential.  
\_\_\_\_ Works regularly with oversize documents (larger than 11 x 17 inches).  
\_\_\_\_ Does not work regularly with oversize documents (larger than 11 x 17 inches).

- C. Please indicate the equipment required by this job in the individual office/workspace.

Furniture, located within individual office/workspace:

- \_\_\_\_ Primary work surface (such as a desk).  
\_\_\_\_ Please specify the length: \_\_\_\_\_  
\_\_\_\_ Work surfaces (such as tables or credenzas) in addition to those listed above:  
\_\_\_\_ Up to 5 feet in total additional length.  
\_\_\_\_ 5 to 10 feet in total additional length.  
\_\_\_\_ More than 10 feet in total additional length.  
\_\_\_\_ Computer keyboard tray.  
\_\_\_\_ Visitor chairs. Number: \_\_\_\_\_  
\_\_\_\_ Filing cabinets:  
\_\_\_\_ Lateral filing cabinets.  
\_\_\_\_ Total number of drawers: \_\_\_\_\_  
\_\_\_\_ Standard filing cabinets.  
\_\_\_\_ Total number of drawers: \_\_\_\_\_  
\_\_\_\_ Bookshelves:  
\_\_\_\_ Total lineal feet of shelf: \_\_\_\_\_  
\_\_\_\_ Conference table seating in the individual office/workspace:  
\_\_\_\_ For 2 or 3.  
\_\_\_\_ For 4.  
\_\_\_\_ Other (please specify): \_\_\_\_\_  
\_\_\_\_ Other furniture (please specify): \_\_\_\_\_  
\_\_\_\_ Other furniture (please specify): \_\_\_\_\_  
\_\_\_\_ Other furniture (please specify): \_\_\_\_\_  
\_\_\_\_ Other furniture (please specify): \_\_\_\_\_

Office equipment located within the individual office/workspace:

- \_\_\_\_ Personal Computers. How many? \_\_\_\_\_  
\_\_\_\_ Telephone set.  
\_\_\_\_ Printer:  
\_\_\_\_ Laser.  
\_\_\_\_ Dot-matrix.  
\_\_\_\_ Daisy Wheel.  
\_\_\_\_ Other (please specify): \_\_\_\_\_  
\_\_\_\_ Fax Machine.

Equipment continued:

- 2-Way Radio.
- Optical Scanner.
- CAD Station.
- CAD Plotter.
- Micro-fiche Reader.
- Drafting Table.
- Typewriter.
- Shredder.
- Other equipment (please specify): \_\_\_\_\_
- Other equipment (please specify): \_\_\_\_\_
- Other equipment (please specify): \_\_\_\_\_

D. Please indicate the size of the present typical office/workspace currently used for this job.

Width: \_\_\_\_\_ feet Length: \_\_\_\_\_ feet

### III. ADDITIONAL INFORMATION

Is there anything else you can tell us about the office/workspace for this job which will help us to determine its space needs?

Agency/Institution Approval:

---

**INSTRUCTIONS FOR COMPLETING**  
**OFFICE AND WORK STATION REQUEST FORM (FORM "A")**

**Column 1, Position Title.** For each applicable position in your department or agency, list the position title assigned by the Department of Human Resource Management.

**Column 2, Space Standard Group.** List the Group ("A Group," "B Group," etc.) which has been assigned for this position. If an assignment has not been made, list the Group which best applies. The Groups are described in Section IV in the General Office Space Standards.

**Column 3, Open or Private.** List "O" if an open work station has been assigned for this position, "P" if a private office has been assigned. If an assignment has not been made, list "O" unless the criteria for a private office have been met.

**Column 4, Space Standard Assignable Area.** List the area in square feet which has been assigned for this position. If an assignment has not been made, find the appropriate area in square feet under the Group. For example, if a position is in the "E Group" the assignment is an open office work station with an area of 100 sq.ft. If a position is in the "H Group," the assignment is an 81 sq.ft. open work station, unless the requirements are met for 100 sq.ft.

**Column 5, Number of FTE's in Position.** List the number of full time equivalent employees in this position.

**Column 6, Total Assignable Area for Position (Col. 5 x Col. 4).** This is the total assignable office area required for each position listed, following the Space Standards. The "Subtotal Column 6" gives the total assignable office area for the page.

**Column 7, Actual Space Requested For Position.** This is the total assignable office area actually requested for each position. Where deviations from the Space Standards are not requested, the numbers will be the same as those in Column 4. Where deviations are requested, insert the areas requested.

**INSTRUCTIONS FOR COMPLETING**  
**OFFICE SUPPORT SPACE REQUEST FORM (FORM "B")**

**Column 1, Type of Support Area.** List the function of the support area, such as "Conference Room," "Work Room," "Copy Area," "Reception Area," etc. Do not include break areas.

**Column 2, Open or Private.** List "O" for "open" if the support area does not need a door and enclosure by floor-to-ceiling walls. List "P" if the space must be private.

**Column 3, Conference Rooms and reception Areas.** Use this column only for conference rooms and reception areas.

**Column 3.1, Designation.** List the space standard designation for the conference room or reception area. The designations are found in Section IV in the Space Standards for conference rooms and reception areas. Example: A conference room for eight people has the designation CR8. Conference rooms for more than 20 people and reception area for more than eight people must be dealt with on a case-by-case basis as specialized space.

**Column 3.2, Space Standard Assignable Area.** List the space standard assignable area from Section IV. Example: Conference Room CR8 has an area of 200 sq.ft.

**Column 4, Support Areas (File Areas, Copy Areas, Libraries, etc.).** Use this column to calculate support area space needs based on Furniture and Equipment Space Standards.

**Column 4.1, Type of Furniture or Equipment.** List the type of furniture or equipment from the Furniture and Equipment Space Standards in Section IV, for example, "storage cabinet" or "work table." Also list required types of furniture and equipment which are not listed in the space standards, for example a microfilm reader.

**Column 4.2, Designation.** List the designation for the item of furniture and equipment. The designations are found in the Space Standards. For example, a storage cabinet 18 inches deep and 36 inches long is designated SC3. Omit a designation for required types of furniture and equipment not listed in the space standards.

**Column 4.3, Quantity.** List the quantity of each type of furniture and equipment, for example "3" storage cabinets SC3.

**Column 4.4, Space Standard Assignable Area.** Find the assignable area in the Space Standards. For example, the assignable area for storage cabinet SC3 is 15 sq.ft.

**Column 4.5, Space Allocation (Col. 4.3 x Col. 4.4).** Multiply these two column numbers together for the total area required for a particular item in the particular space. Using the example for columns 4.3 and 4.4, multiply the quantity "3" times the space standard "15" for a total of 45 sq.ft.

**Column 5, Assignable Area of Each Support Space, Column 3.2 or Total in Column 4.5.** For conference rooms and reception areas the assignable area for the space is the number in column 3.2. For other support areas it is the total of the space allocations in column 4.5 for a particular space, for example "work room."

**INSTRUCTIONS FOR COMPLETING**  
**SPACE REQUEST SUMMARY FORM (FORM "C")**

**Line A, Subtotals of Space Requested, from Office and Work Station Request Form (Form "A"), Column 8.** From each page of Form "A" used, enter the subtotal for column 8, which is the subtotal of areas requested for each position. Enter the total for Line A.

**Line B, Subtotals of Space Based on Space Standards, from Office and Work Station Request Form (Form "A"), Column 7.** From each page of Form "A" used, enter the subtotal for column 7, which is the subtotal of areas for each position given in the Space Standards. Enter the total for Line B.

**Line C, Difference Between Standards and Space Requested (Total Line A less Total Line B).** If Total Line A exceed Total Line B, this is the amount by which space requested exceeds the amount assigned by the Space Standards.

**Line D, Subtotals from Office Support Space Request Forms (Form "B"), Column 5.** From each page of Form "B" used, enter the subtotal for Column 5, which is the subtotal of areas of each support space listed. Enter the total for Line D.

**Line E, Total Area of Work Stations and Support Space Requested (Sum of Totals Line A and Line D).** Add the office and work station area requested (Total Line A) to the total office support space requested (Total Line B) and enter the sum on Line #.

**Line F, Area of Internal Circulation.** Internal circulation is calculated as a percentage of the area of offices and work stations and support spaces. Determine from the Space Standards whether the internal circulation and partition factor is 30 percent or 35 percent. Enter the correct percentage. Multiply this percentage by the area on Line E to determine the area of internal circulation space.

**Line G, Total Space Requested (Sum of Lines E and F).** Adding the total net area requested for offices and work stations and support spaces (Line E) to the area of internal circulation (Line F) gives the totals space requested. (This does not include areas of special spaces specific to a particular agency or institution.)

**INSTRUCTIONS FOR COMPLETING**  
**DEVIATION FROM OFFICE AND WORK STATION SPACE STANDARDS REQUEST FORM (FORM**  
**"D")**

**Column 1, Position Title.** Enter the position title corresponding to the position class code.

**Column 2, Space Standard.**

**Column 2.1, Group.** List the Space Standard Group designation for the position ("A," "B," etc.)

**Column 2.2, Open or Private.** List "O" if an open office work station has been assigned for this position, "P" if a private office..

**Column 2.3, Area (Sq. Ft.).** List the area assigned for this position in the Space Standards.

**Column 3, Space Requested.**

**Column 3.1, Open or Private.** List "O" if an open office work station is requested, "P" if a private office.

**Column 3.2, Area (Sq. Ft.).** List the area requested for this position..

**Column 4, Difference Between Standard and Request (Col. 3.2 less Col. 2.3).**  
Subtracting the area of the Space Standard for the position (Col. 3.3) from the area requested (Col. 3.2) will show how much more space is requested than the Space Standard.

**Column 5, No. of FTE's Affected.** List the number of full time employees in this position for whom the deviation is requested.

**Column 6, Total Difference Between Standards and Request (Col. 5 x Col. 6).**  
Multiplying additional space requested for each office or work station (Col. 5) by the number of employees affected (Col. 6) gives the total amount of net area requested for this position in excess of the Space Standards.

**Reason for Request.** Briefly list reasons for request for deviation. List specific numbers of visitors or specific items of furniture or equipment where appropriate. Use additional sheets of paper if necessary.

## EXAMPLES OF COMPLETED FORMS

Following are examples of completed space request forms "A", "B", "C", and "D":

## V. DIAGRAMS ILLUSTRATING SPACE STANDARDS

---

The following pages provide diagrams illustrating the space standards for open-office workstations, private offices, conference rooms, and reception areas. These layouts are not intended to plan the use of space, merely to illustrate possibilities within the standard areas. Also, included in this section are diagrams showing how the furniture and equipment space standards were derived.

## VI. SPACE ASSIGNMENTS BY POSITION TITLE

---

Space assignments have been determined for each of the position titles active in the State of Utah in the departments affected by the standards (please refer to Section III for the departments excluded from the standards). This information has been entered into a database maintained by the Division of Facilities and Construction Management and reflect position titles and descriptions in use as of July 1, 1993.

The position titles, class codes and position description information was supplied by the Department of Human Resource Management. The listing of these positions and space assignments are included in two formats: the first list is organized in alphabetical order using the position title and the second is sorted by position class code number.

The listings include the position classification code ("CLASS CODE"), the position title ("POSITION TITLE") and the number of employees in each position listed **as of July 1, 1993** ("POSITION TOTAL"). In addition, the number of employees by department is included. Each department is included as a separate column with an abbreviated title. The abbreviated titles and the full department title are summarized as follows:

DEPARTMENT/INSTITUTION	DATABASE CODE
ADMINISTRATIVE SERVICES	DAS
AGRICULTURE	DAG
ALCOHOLIC BEVERAGE CONTROL	ABC
ATTORNEY GENERAL	AG
BOARD OF EDUCATION	SBE
BOARD OF REGENTS	BOR
BUILDING BOARD CONSTRUCTION ACCOUNT	BBCA
CAREER SERVICE REVIEW BOARD	CSRB
COMMERCE	C
COMMUNITY AND ECONOMIC DEVELOPMENT	DCED
CORRECTIONS	DOC

DEPARTMENT/INSTITUTION	DATABASE CODE
EMPLOYMENT SECURITY	DES
ENVIRONMENTAL QUALITY	DEQ
FINANCIAL INSTITUTIONS	FI
HEALTH	DOH
HUMAN SERVICES	DHS
HUMAN RESOURCE MANAGEMENT	DHRM
INDUSTRIAL COMMISSION	IC
INSURANCE	ID
JUDICIAL COUNCIL (COURTS)	JC
NATURAL RESOURCES	DNR
PUBLIC SERVICE COMMISSION	PSC
PUBLIC SAFETY	DPS
STATE AUDITOR	SA
STATE TREASURER	ST
TAX COMMISSION	TC
TRANSPORTATION	UDOT
UNIVERSITY OF UTAH	UOU

Positions with no assignment are those positions for which no information was received from the agency or institution.

**POSITION LISTING BY ALPHABETICAL ORDER OF POSITION TITLE**

# Space Assignments by Position Title

## List by Alphabetical Order of Position Title

The General Office Space Standards for positions in Groups "C," "D," "E," and "G" are open office work stations unless the criteria for private offices are met. Both the open office space standard and a private office are listed for each position in those groups for which a private office may be warranted.

Class Code	Position Title	Position Total	Space Assignments

**POSITION LISTING BY NUMERICAL ORDER OF POSITION CLASS CODE**

## Space Assignments by Position Title

List by Numerical Order of Position Class Code

The General Office Space Standards for positions in Groups "C," "D," "E," and "G" are open office work stations unless the criteria for private offices are met. Both the open office space standard and a private office are listed for each position in those groups for which a private office may be warranted.

Class Code	Position Title	Position Total	Space Assignments		
			Group	Open (SqFt)	Private (SqFt)

## VII. DEFINITIONS

---

**Assignable Area:** The actual space required by programmed activities. Computed by measuring from inside finished surface to inside finished surface of an individual room or space. Assignable area does not include circulation or general building support spaces such as toilet and mechanical rooms.

**Conventional Furniture Factor:** A percentage to be added to the space standards for open office work stations when conventional furniture is to be used. The space standards for open office work stations are based on systems furniture, and the "conventional furniture factor" is necessary because conventional furniture requires more space than systems furniture.

**Conventional Furniture:** Separate freestanding items of furniture such as desks, credenzas, filing cabinets and bookcases.

**Full-Time Equivalent Employees (FTEs):** State employees considered by the State Department of Human Resource Management or other monitoring agency to be employed full time.

**Gross Area:** Computed by measuring from outside face of outer building wall to outside face of outer building wall.

**Internal Circulation and Partition Factor:** A percentage to be multiplied by the space standards for offices and support spaces to allow for aisles, halls and partitions within a department or agency area.

**Position Class Code:** A multi-digit number assigned by the State Department of Human Resource Management or other State agency to designate a specific State position.

**Position Title:** The official name given to a position by the State Department of Human Resource Management or other designating agency. Each position title corresponds to a position class code. Multiple position class codes can have the same position title. A position title could be changed while the position could keep the same position class code.

**Net Area:** Same as assignable area.

**Net Usable Area:** Computed by measuring from the inside finished surface of the outer building wall (usually glass) to the finished surface of permanent interior walls. Vertical penetrations, hallways and corridors, lobbies, toilet rooms, mechanical and electrical rooms are not included. No deduction is made for columns and necessary building projections.

**Net Rentable Area:** Computed by measuring from inside finished surface of the outer building wall to the inside finished surface of the outer building wall (usually glass). Vertical penetrations (stairs, elevators, shafts, etc.) are not included. No deduction is made for columns and necessary building projections.

**Non-Specialized Space:** Assignable space which is found in most office environments. Non-specialized space includes closed offices, open office work stations, and office support spaces. The Utah State Office Space Standards apply to non-specialized space.

**Office Support Spaces:** Spaces in addition to personal offices which are needed for the functioning of most office environments, such as conference, reception, copy, and file areas. Support spaces may be rooms with walls floor-to-ceiling or areas with low partitions in an open office plan.

**Open Office Work Station:** A single person office space whose partitions don't extend to the ceiling and which is entered through a doorless opening. The most common partition height in Utah State facilities is about five feet.

**Private Office:** A single person office space, also called a "private" or "hardwall" office, with a door and floor-to-ceiling partitions.

**Programming:** The process of documenting the space needs of an agency or institution in quantitative and qualitative terms for use by an architect or space planner.

**Specialized Space:** Assignable space which meets special needs of specific agencies but is not found in most office environments. Examples are driver license examining areas, hearing rooms, and a wine-tasting room. The Utah State Office Space Standards do not include standards for specialized space.

**Systems Furniture:** Systems of interconnecting parts or components (work surfaces, drawers, keyboard trays, divider panels, etc.) from which entire work stations including partitions can be assembled as single integrated pieces of furniture.
